# Milan Paunović

React • React-Native • Frontend Developer @Visit.com Adriatic
Smederevo, Centralna Srbija, Serbia

## Summary

Passionate Frontend Developer | React & React Native Specialist

As a results-driven and highly independent Frontend Developer,
I specialize in crafting responsive, modern, and user-friendly
applications using React and React Native. My dedication to
delivering exceptional user experiences is evident in my successful
track record, which includes developing a React-Native-based
Android application for hyper-local shopping and creating a
platform connecting businesses with remote workers using React
(TypeScript) and Redux.

I thrive in dynamic and forward-thinking environments, constantly
seeking to enhance my skills and stay abreast of the latest
technologies. Open to embracing new technologies and innovative
approaches, I am committed to delivering high-quality projects.
My passion for creating user-oriented software extends beyond
individual projects, as I actively contribute to the success of teams
through collaboration and a drive for excellence.

Let's connect and explore how my expertise and enthusiasm can
contribute to your team's success!

---

## Experience

**Visit.com Adriatic**
Frontend Developer
February 2023 - Present (1 year 10 months)
Belgrade, Serbia

As a Frontend Developer at Visit Group, a Gothenburg-based company
offering innovative products for the Nordic tourism industry, I lead initiatives to
modernize and enhance the BookVisit business unit. My contributions include:

Spearheading the transformation of legacy MVC web apps to modern React and NextJS, resulting in a notable increase in sales.

Upgrading React projects, refactoring them for improved performance and consistency.

Collaborating seamlessly with Swedish counterparts, resolving issues, and ensuring regular updates for customer satisfaction.

Modifying and extending REST API and .Net projects to align seamlessly with frontend requirements.

## Savicsoft
### Frontend Developer
January 2022 - February 2023 (1 year 2 months)
Jagodina, Centralna Srbija, Serbia

As a member of a small startup, I gained valuable experience in connecting international companies with high-quality remote workers in their respective regions. In this role, I developed QuickDeal, a React-Native-based android application for hyper-local shopping and selling that saw 100 listings within the first month of launch. I also collaborated with a small team to replicate given Figma designs using React Native components and successfully implemented client-side caching techniques to reduce page loading times by 50%. Additionally, I autonomously created the frontend for TalentBase, a platform connecting businesses with remote workers using React (TypeScript) and Redux, which saw 500 registered users within the first month of launch. I consistently delivered fully functional applications within tight time frames and improved application performance through advanced optimization techniques, resulting in a 30% increase in page loading speeds.

## Freelance
### Freelance Frontend Developer
May 2021 - January 2022 (9 months)
Smederevo, Centralna Srbija, Serbia

As a freelance Frontend developer, I assisted local small businesses in enhancing their online presence and reaching new customers through targeted website updates and design improvements. I developed visually appealing and user-friendly static and dynamic web presentations for small local traditional businesses, resulting in a 25% increase in website traffic. I also created targeted static landing pages for local companies, leading to a 50% increase in online inquiries. Additionally, I implemented best practices in SEO to improve search engine rankings and drive organic traffic to client websites.
